

SLIDE LIFT SERIES

The GPST Series

GPST SPECIFICATIONS

The GPST is MAXON's latest addition to its Slider product range. This slider is explicitly designed for trucks and excels in performance as well as compact dimensions

- The GPST features the unique X1 technology which utilizes only one lift and one tilt cylinder, resulting in less parts (e.g. less hoses, valves, etc.) and consequently less maintenance costs
- The GPST utilizes two opposing cylinders to slide in and out resulting in a smooth and reliable deployment
- The GPST features a unique Quick Lock mechanism. The Quick Lock carries the load (not the rollers) and avoids platform bouncing when moving load from the truck to the platform
- The GPST flip over section is torsion spring assisted for effortless opening and closing
- The GPST features 2-speed cylinders that slow the platform when it touches the ground and tilts down automatically

MODEL CAPACITY	OVERALL WEIGHT	PLATFORM SIZE	BED HEIGHT
GPST-44 (4,400 Lbs.)	1,654 Lbs.	67" X 94.5"	38" Laden 56" Unladen

Lift Dimensions and Mounting Requirements

SLIDE LIFT SERIES

The GPST Series

Standard Features

- Torsion spring assisted flip over section
- Dual cart stops
- Foot controls (can be disabled if not needed)
- Warning lights
- Maintenance-free bushings
- Completely sealed wiring harness
- Hand held control

Unique X1 Technology

The unique X1 technology utilizes only one lift and one tilt cylinder. Resulting in less parts (e.g. less hoses, valves, etc.) and consequently less maintenance costs

Double Acting Cylinders

The GPST slides in and out via double acting cylinders that ensure smooth and gentle sliding

Unique Locking Mechanism

The GPST's Quick Lock carries the load (not the rollers) and avoids platform bouncing when moving load from the truck to the platform

Electrical & Trouble Shooting Features

The GPST offers a service switch that allows you to trouble shoot the gate and to operate the gate if the main control fails. The wiring harness is fully sealed
